

KUNAL SHINDE

Kunalms203@gmail.com | +91 9527928965 | linkedin.com/kunal-shinde2003 | Github.com/kunalms203

SKILLS

- **Languages** : HTML, CSS, JavaScript, Python, Java
- **Front-end**: React Js, Redux, Tailwind CSS, Bootstrap
- **Mobile Development**: React Native
- **Backend** : Node.js, Express
- **Databases**: MySQL, MongoDB, PostgreSQL
- **Blockchain**: Ethereum, Smart Contracts
- **Other** : Git, Github, Docker

EDUCATION

Sahyadri valley college of engineering, Pune
B.E, Artificial Intelligence & Machine Learning

2022-2025

Siddhant college of engineering, pune
Diploma in Computer Engineering

2019-2022

EXPERIENCE

Austere Systems Limited

September 2025 – Present

Full Stack Developer

- Contributed to the Blockchain Document Vault project for Jalna Municipal Corporation, enabling secure digital document management and reducing manual verification efforts by 50%.
- Built responsive web and mobile application features using React Native for Kulgaon Badlapur Municipal Council projects, enhancing application performance and user engagement by 30%.
- Developed React.js frontend modules for the Municipal Corporation Faridabad Building Planning System, accelerating approval workflow processes and improving UI responsiveness by 40%.
- Developed frontend modules for WaterNetInfraa, improving real-time project tracking efficiency by 40% for water supply and pipeline infrastructure projects.

Logion Solutions

February 2025 – April 2025

Full Stack Developer Intern

- Architected a backend admin dashboard for product management, streamlining inventory updates and reducing manual data entry by 50%.
- Launched MERN stack applications using Next.js, enhancing frontend performance by 30% through optimized API calls and server-side rendering.
- Partnered with a 3-person dev team in Agile environments, contributing to sprints and stand-ups to deliver scalable modules on time.
- Converted high-fidelity Figma designs into pixel-perfect, responsive UIs using React.js, enhancing design accuracy and overall user experience.

PROJECTS

FLOWFORGE

[Link](#)

Tech Stack : Next.js, React 19, TypeScript, Express.js, Prisma, PostgreSQL, TanStack Query, Docker

- Engineered a multi-tenant project management SaaS with 5-tier RBAC (Owner to Viewer) and tenant isolation middleware to ensure strict multi-workspace data security.
- Built an interactive Kanban board utilizing @hello-pangea/dnd and TanStack Query with optimistic UI mutations, reducing UI interaction latency for task transitions to sub-50ms.
- Designed secure authentication with dual-token JWT rotation, DB session tracking with hashed refresh tokens, and multi-device revocation.
- Hardened backend with rate limiting, Helmet, Zod input validation, Winston structured logging, and containerized the entire ecosystem using Docker Compose.

AI-Integrated Real-Time Chat Application

[Link](#)

Tech Stack : React.js, Tailwind CSS, MongoDB, Node.js, DeepSeek AI, JavaScript, JWT

- Embedded DeepSeek AI to enhance user interactions with AI-driven responses, sentiment analysis, and contextual understanding, resulting in a 35% improvement in response accuracy.
- Secured user data with end-to-end encryption and JWT authentication, preventing unauthorized access entirely.
- Maximized uptime to 99.9% by utilizing MongoDB Atlas for data persistence and WebSocket for real-time messaging.

ACHIEVEMENTS

- **Contributed** to the "Better Roads for Tomorrow" Hackathon, creating innovative infrastructure solutions and proposing a scalable tech approach to road safety.
